

Activity

OnClickListener

at.fhooe.kls.PasswordPopUp

```
graph BT; subgraph Inheritance; direction TB; A[Activity]; O[OnClickListener]; end; P[at.fhooe.kls.PasswordPopUp]; P --> A; P --> O;
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the parent classes: 'Activity' on the left and 'OnClickListener' on the right. Below these, a third box represents the child class: 'at.fhooe.kls.PasswordPopUp'. Two arrows originate from the bottom of the 'at.fhooe.kls.PasswordPopUp' box and point upwards to the bottom of the 'Activity' and 'OnClickListener' boxes, indicating that 'at.fhooe.kls.PasswordPopUp' inherits from both 'Activity' and 'OnClickListener'.
